-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 23 April 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

***Election/Restrictions***

Claims 5,7 and 9 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 4/23/07.

Applicant listed claims 1 and 3-6 as reading on the elected species of Figs. 1-8. However, the Examiner believes claims 1,3,4,6 and 8 read on the elected species. Claim 5 reads on a nonelected species and claim 8 does read on the elected species.

***Specification***

Claim 1 is objected to because of the following informalities: the appearance of words in all capitals is improper.

***Claim Rejections - 35 USC § 112***

Claims 1,3,4,6 and 8 are rejected under 35 U.S.C. 112, second paragraph as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, there is no antecedent basis for "both sidewalls". The phrase "and is formed in either another circular cone or a cylindrical shape" is ambiguously worded and the recitation thereafter of "said another circular-cone shape" is ambiguous since such is but one of the aforementioned options. Appropriate correction is required.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3634

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese patent No. 11206552 ('552) in view of Fraczek '430.

'552 discloses a headrail 10, case 11 having a slit 13, a guide (walls of the slit 13) and sidewalls, a shaft 9, drum 1, and ring 5. What is not shown are the conical shape for the drum and the angled sidewall. However, both features are taught by Fraczek as best seen in Fig. 7. In view of this teaching, it would have been obvious to modify '552 to have such a conically shaped drum and an angled surface so as to more efficiently guide the cord onto and off of the drum.

Claim 4/1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese '552 in view of Fraczek as applied above, and further in view of European patent No. 355244.

Providing a guide that protrudes downwardly from a base is taught by '244 at 11 and it would have been obvious to provide the base of '552 with such a downwardly extending guide to control the cord as it approaches the drum.

#### ***Allowable Subject Matter***

Claims 3,6 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
